

## Benefits

- Excellent vibration reduction : 12 to 36 dB (on multiple tones)
- Total suppression of the most annoying harmonics
- Space & weight saving
- Provides outstanding passenger comfort and noiseless ride
- Improves the noise and vibration health and safety at work
- Extends crew shift exposure
- Reduces noise pollution impact on marine species ; helps achieving quieter oceans
- Improves the threshold of oceanographic research vessel sonar detection
- Improves stability, alignment, shock sway, creep, ride quality
- Performance upgrade of existing machines with minimum impact (Add-on kit)

**STRACTIVE™ is the most decisive solution of the Hutchinson global noise and vibration offer.**

**Active Vibration Control Test Results**

# STRACTIVE™

**Active Noise and Vibration Control System**

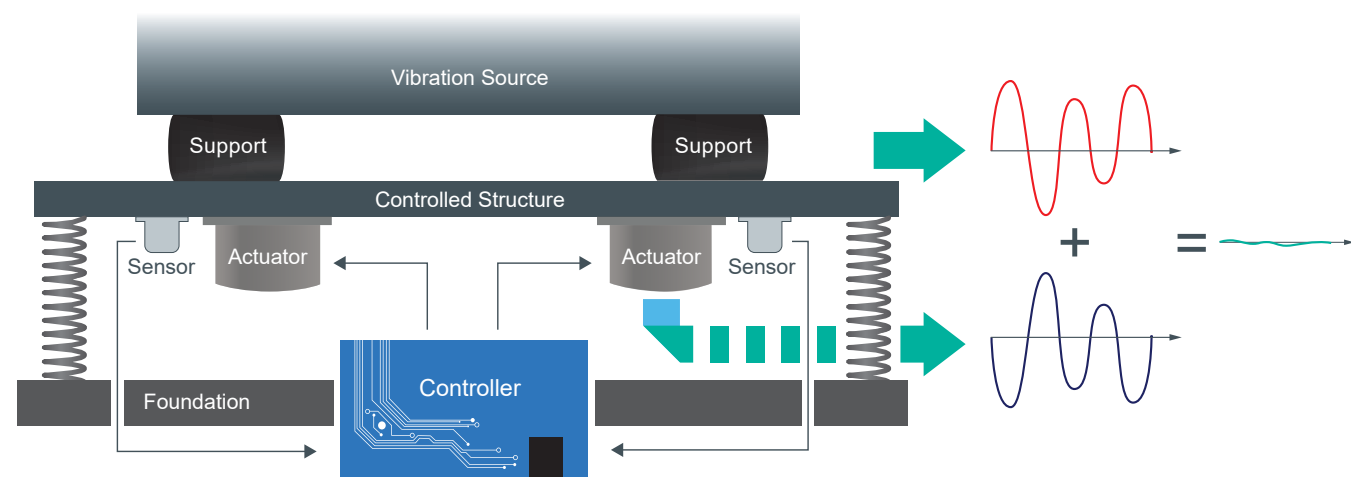

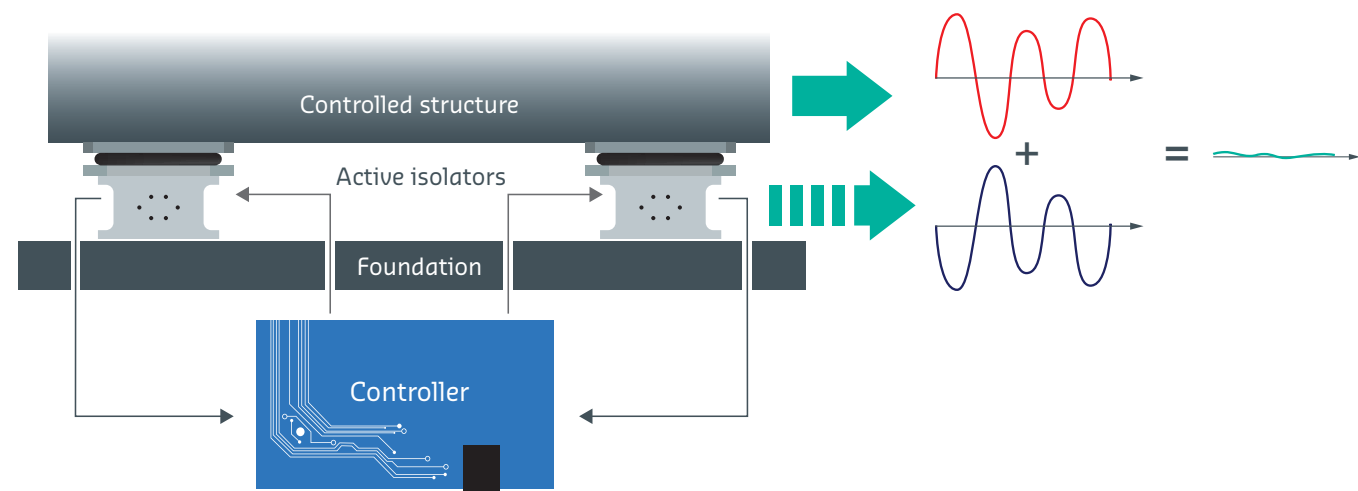

## Principle

Our field proven Active Noise and Vibration Controls System (ANVCS) STRACTIVE™ will meet your toughest needs in noise and vibration reduction.

Active isolators cancel the incoming vibration by generating a dynamic force of same magnitude in opposite phase through the use of electrodynamic actuators, thus improving the low frequency performance of the suspension.

## Products

200 N range

600 / 1 000 N range

## Applications

The applications of Stractive™ are endless : reactive silencer, electric motor, transformers, internal combustion engines, structures, pumps, to name a few. It is particularly suited for hybrid and diesel-electric propulsion rafted systems.

Submarine

Research vessel

Yacht

Navy
